This document explains how to fill out the exported Excel sheet. It maps every column in the Excel file directly to the visual sections on your Product Details Page (PDP) Figma design.

[!TIP]

Important Rule for Images: You cannot upload actual .png or .jpg files directly into Excel. First, upload all your images to the **Media** section in the CMS. Then, in the Excel sheet, simply type the exact **filename** (e.g., avocado.png). The system will automatically link the images!

1. Top Section (Hero Area)

This is the main top area of the PDP, showing the bottle, title, and initial details.

Excel Column Name	What it is on the Website (Figma)	Example Value
title	The main big product name	Avocado Smoothie
subtitle	The bold text right below the title	Made From Fresh Lemons
description	The paragraph text below the subtitle	Cold Pressed, Zero Added Sugar. Rich In Vitamin C And Natural Enzymes.
category	The small label above the title	Smoothies (or Juices)
bgColor	Fallback background color for the left side	#8B9E4C
gradientBg	The dynamic gradient background color for the left section	linear-gradient(180deg, #8B9E4C 0%, rgba(139, 158, 76, 0.5) 100%)
image	The main big bottle image	avocado-smoothie-front.png
gallery	The small thumbnail bottle images below the main image	avocado-back1.png, avocado-back2.png (Comma-separated)
benefits	The light green highlight pills (e.g., No Added Sugar, Cold Pressed)	No Added Sugar, Cold Pressed, Rich In Vitamin C (Comma-separated)
sizes	The available size selector buttons (e.g., 100ml, 250ml)	100ml, 250ml, 500ml, 1L (Comma-separated)

2. Ingredients & Benefits Section

The grid showing pictures of individual fruits/ingredients.

Excel Column Name	What it is on the Website (Figma)	Example Value
ingredientsTitle	The title of this section	Ingredients & Benefits
ingredients	The grid of fruits with images, names, and descriptions. (Must be formatted as JSON)	[{"name": "Avocado", "desc": "Smooth, creamy...", "image": "avocado-fruit.png"}, {"name": "Lemon", "desc": "Juice ingredients...", "image": "lemon-fruit.png"}]

3. Good To Know Section

The green banner with storage instructions and the 3 icons below it.

Excel Column Name	What it is on the Website (Figma)	Example Value
goodToKnow_title	Title inside the green box	Good To Know
goodToKnow_description	Storage instructions inside the green box	Natural Separation May Occur... Keep Refrigerated.
highlights	The 3 icons with text below the green box (e.g., 100% Fresh). (Must be formatted as JSON)	[{"label": "100% Fresh", "icon": "leaf-icon.png"}, {"label": "100% Cold Pressed", "icon": "temp-icon.png"}]

4. Why You'll Love It Section

The text area with bullet points.

Excel Column Name	What it is on the Website (Figma)	Example Value
<code>whyYouLoveItGroup_headingText</code>	The title of the section	Why You'll Love It
<code>whyYouLoveItGroup_subheadingText</code>	The paragraph intro text	We Believe That Nature Grows Best...
<code>whyYouLoveItGroup_points</code>	The tick-mark bullet points below the text	Cold-Pressed Never Heated, Locally Sourced Produce, Made Fresh Daily (<i>Comma-separated</i>)

5. Nutritional Information Section

The circular gauges showing percentages.

Excel Column Name	What it is on the Website (Figma)	Example Value
<code>nutrition_title</code>	The title of the section	Nutritional Information
<code>nutrition_items</code>	The circular percentage gauges. (Must be formatted as JSON)	<pre>[{"label": "Vitamin C", "percentage": 60, "desc": "Daily Value"}, {"label": "Hydration Support", "percentage": 88, "desc": ""}]</pre>

6. Taste Profile Section

The horizontal bars showing sweetness, creaminess, etc.

Excel Column Name	What it is on the Website (Figma)	Example Value
<code>tasteProfile_title</code>	The title of the section	Taste Profile
<code>tasteProfile_items</code>	The rating sliders (Value must be from 1 to 5). (Must be formatted as JSON)	<pre>[{"label": "Sweetness", "value": 3}, {"label": "Creaminess", "value": 4}, {"label": "Citrus", "value": 2}]</pre>

[!WARNING]

Working with JSON fields (`ingredients`, `highlights`, `nutrition_items`, `tasteProfile_items`):

These fields require special formatting because they contain multiple pieces of information (like an image + title + description) in a single row.

The easiest way to update these: First, create ONE product manually inside the Payload CMS Admin Panel and fill out all the fields perfectly. Then, click **"Export to Excel"**. You can then just copy-paste the JSON format from that exported row to your new products in Excel and just change the words inside the quotes!
